

Softmagnetic Alloys

Softmag alloys have high magnetic permeability and low saturation and small hysteresis loss. It has high induction with suitable permeability. It has small core losses and great magnetic shielding properties.

Applications

Softmag alloys are used in temperature regulation magnetic devices, switches, measuring apparatus, transducers, current transformers, relay cores etc.

Softmagnetic alloy grades

Softmag 30	Softmag 36	Softmag 48	Softmag 53	Softmag 76	Softmag 78
------------	------------	------------	------------	------------	------------

Available Forms

Wire, Sheet, Wiremesh, Strip, Foil, Plate
